MARCH 1, 2023

Dear Hiring Manager,

I am writing to express my interest in the position with CardinalCommerce as a Mobile Development Intern. As a current Software Engineering student at Brigham Young University-Idaho, I have developed a strong foundation in programming languages including Python, C++, and SQL. Additionally, I have experience in HTML, CSS, JavaScript, NodeJS, NoSQL databases, and other technologies.

My studies have also equipped me with a range of skills, including efficiency metrics, modularization, encapsulation, design patterns, relation diagrams (UML, DFD, etc.), and unit testing. I am a disciplined, fast learner, and an effective communicator who is fluent in both Spanish and English.

I have previous work experience in a technical support position, where I was responsible for troubleshooting the institution's software and reporting bugs to the Developers. Additionally, I have worked as a sales representative, where I honed my interpersonal and presentation skills.

I also have experience building mobile applications; I have used Flutter in my projects before and I'm familiar with Reactive Native. I am confident that I can create and code appropriate solutions from broadly described challenges.

I am excited about the opportunity to work with your team. Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Carlos Lespin
